

## IPS Empress® CAD

IPS Empress® CAD is associated with more than 20 years of successful clinical performance. It closely reproduces the natural tooth structure due to its distinct chameleon effect and lifelike fluorescence. IPS Empress CAD is known for exceptional esthetics, and it can be easily polished to a high gloss: grind – polish – done. The innovative polychromatic IPS Empress CAD Multi block is a particular highlight of the assortment. It is characterized by a natural-looking transition of the shade and fluorescence between the dentin and incisal areas.
