

Vista-Tec LupOn

Protective shields for Loupes

Vista-Tec LupOn kit protects lenses and loupes systems thanks to its wide and durable polycarbonate shield. The wide polycarbonate shields, available in 2 sizes (medium and large), fit into the support clips attached to the frame by the silicone bands oRings. Vista-Tec LupOn clips can also be used on spectacles with temple arms over 1 cm high.

Vista-Tec LupOn selection guide

use Lupon
M-Shield with
Galilean Loupes

use Lupon
L-Shield with
prismatic Loupes

Vista-Tec ilGrande

The extended protection

Vista-Tec ilGrande is much more than an elegant face protection equipment. It is a statement of respect towards yourself, your practice and your patients. Its wide, resistant and replaceable polycarbonate shield grants a high level of protection against liquid splashes, while the premium optical properties provide pleasant and relaxed vision. Vista-Tec ilGrande also features a head band which makes it comfortable to wear on longer working days. Both frame and head band can be autoclaved for maximum safety.

Vista-Tec laStoria

The original face shield
Since 1989

The elegant Vista-Tec face shield, appreciated by dental and health professionals since its conception in 1989, now redesigned with enhanced protection features. The ultra-lightweight face shield includes a durable, replaceable polycarbonate shield that provides premium optical properties for a relaxed vision, reducing unnecessary eyestrain over longer work hours. Vista-Tec laStoria features a silicone head band that enables optimized stability and comfort.
